

SJX Carat and Gold Series

Portable Balances

A Dynamic Weighing Experience with the Next Generation of OHAUS Carat and Gold Portable Balances

Designed for a wide range of Legal-for-Trade applications, the Class II and Class III certified SJX Carat and Gold balances are ideal for weighing jewelry, precious metals and gemstones. Equipped with superior overload protection, large backlit display, fast stabilization time, multiple weighing units, application modes and connectivity options, these slim balances offer a truly user-friendly weighing experience.

Standard Features Include:

- Geared for the Job with Legal-for-Trade Approvals & Superior Overload Protection Scout meets Class II and III accuracy requirements for countertop retail applications. Integrated superior overload protection system protects the balance from damage ensuring durability in everyday applications.
- Large Backlit LCD Clearly Shows Weighing Results in Retail Applications
 The Scout SJX is equipped with a bright white backlit display which shows the net weight of precious metals and stones clearly. An optional auxiliary display can also be installed.
- Fast Weighing Speed and High Resolution Deliver Repeatable and Reliable Results Stabilization time as fast as 1 second means quick results and increased efficiency. Equipped with superior weighing technology, the Scout also ensures repeatable and reliable weighing results.
- Multiple Connectivity Options Available for Data Logging and Communication With expanded connectivity options including RS232, USB Host, USB Device, Ethernet and Bluetooth®, the Scout provides added versatility to data logging and communication.

SJX Carat and Gold Series Portable Balances

Legal-for-Trade Approvals

NTEP and Measurement Canada approved models meet or exceed Class II or III accuracy requirements, making the Scout ideal for commercial applications where reliability and precision are essential.

* 0.00 g

Superior Protective Features

The superior mechanical overload protection system of the Scout is comprised of a high-strength stainless steel pan and an impact-resistant plastic pan support. This enables the balance to safely withstand loads up to 10 times its rated capacity.

Clear Viewing of Results

The large backlit LCD provides operators a clear view of their weighing results. An optional auxiliary display can also be installed easily to provide additional weight notifications to customers in retail environments.

Improved Performance

Stabilization time as fast as 1 second and high resolution load cell with up to 150,000d resolution and readability to 0.001g, deliver extremely quick, precise and repeatable weighing results.

Expanded Connectivity Options

Scout has multiple connectivity options for convenient data logging and communication, as well as connecting to an auxiliary display. Options include - RS232, USB Host, USB Device, Ethernet and Bluetooth®. With the USB Host option, you can simply save and transfer data from the balance to a USB drive. The Bluetooth option allows you to wirelessly operate the balance via a mobile device or tablet for Android™.

0.000

Draftshield Model Available

Scout's ingenious draftshield (1mg model only) was designed with an easy to remove top cover piece. This serves as a wind protection ring which keeps the weighing surface stable in drafty environments, while maintaining weighing speed.

- **Weighing**—Determines the weight of items on the pan in the selected unit of measure.
- Parts Counting—Counts the number of pieces on the pan using a uniform weight.
- Percent Weighing
 —Measures the weight of a sample displayed as a percentage of a pre-established reference weight.
- Check Weighing—Compares the weight of a sample against target limits.
- Totalization—Measures cumulative weight of multiple items. Cumulative total may exceed balance capacity.

• **Display Hold**—Manually holds the last stable weight or the first highest stable weighing value on the display.
